Principles of
Assessment

Assessment is conducted in accordance with the following:

Principles of Assessment

Reliability - Wise Education Group seeks to gather and interpret evidence in a consistent manner that provides for reliable assessment both for the learner and for assessors. We achieve this by using assessors who have the required competencies in assessment and the relevant vocational competencies.

Our assessment resources also provide for standardised outcomes supported by model answers to guide assessors in their judgements. Reliability is also supported by the validation of assessment judgements.

Fairness - Wise Education Group assessment approach encourages fairness in assessment through consideration of the learner's needs and through making reasonable adjustments when it is required. Assessors achieve this through clear communication with the learners to ensure that the learner is fully informed about, understands and is able to participate in the assessment process.

The learner will be given the opportunity to challenge the result of any assessment task and undertake re-assessment if required.

Validity –Any assessment decision of Wise Education Group is justified, based on the evidence provided by the individual learner. Wise conducts assessment against the broad range of skills and knowledge identified within each unit of competency and which is integrated with the performance of workplace tasks.

We ensure that the assessment is transferable to different contexts and situations and all components of the unit of competency are being assessed.

Flexibility – Wise Education Group strives to provide assessment opportunities that reflect a learner's needs. Our chosen assessment strategies provide for recognition of a learner's current competency, employ a range of methods appropriate to the context of the industry, the unit of competency and the learner themselves. Individual needs of learners are met as required as the learner notifies Wise Education Group's staff of their need.

Rules of Evidence

Currency – Wise Education Group must be satisfied that the learner currently holds the skills and knowledge relating to a particular unit of competency. Assessment evidence submitted is to be based on the learner's performance either at the time of the assessment decision or in the very recent past.

Sufficiency - Learners are required to complete and submit the assessment tasks provided for each unit. The assessor is assured that the quality, quantity and relevance of the assessment evidence enable a judgement to be made of a learner's competency. The assessment mapping ensures that all aspects of the unit of competency have been satisfied and that competency can be demonstrated repeatedly.

	<p>Validity – Each of the assessment tasks reflect the relevant unit of competency. They cover skills and knowledge required of an individual to perform a wide range of business functions. We collect evidence that directly aligns with the components documented within each unit of competency. The collected assessment evidence must replicate the outputs of the task as though it were being performed within an actual workplace.</p> <p>Authenticity – Wise Education Group seeks evidence that is authentic for each learner. To support this, assessors must be assured that the evidence presented for assessment is the learner’s own work. Learners will need to sign an authenticity declaration as part of submitting their work to state that it is the learner’s own work.</p>
Resources	To adequately support the delivery of the qualification, WISE EDUCATION GROUP will provide requested documentation and handouts to participants in order for them to complete an appropriate assessment.
